

ICFDA16 Plenary Panel Discussion:
How to Improve Image and Impact of Fractional Calculus Research Community
Chair: YangQuan Chen

Organizers: YangQuan Chen, Vasily Tarasov, Dumitru Baleanu and Dragan T. Spasic

One may pose a question: what is in the heart of Fractional Calculus?

Among all possible answers we draw one's attention to an unusual and fascinating article of Paul Halmos: The heart of mathematics, *The American Mathematical Monthly*, Vol. 87, No. 7 (Aug. - Sep., 1980), pp. 519-524*. As stated by Paul Halmos: "The major part of every meaningful life is the solution of problems; a considerable part of the professional life of technicians, engineers, scientists, etc., is the solution of mathematical problems." Therefore, it is very easy to declare that in the heart of Fractional Calculus is a strategy of *problem-posing* and *problem-solving*.

This discussion has to deal with Recognition, Improvement and Impact of Fractional Calculus Research Community in the professional life.

Contributions to this topic comprising hunches, intuitive impressions, case studies, or alike are welcome and should be prepared and sent by e-m to dtspasic@gmail.com.
